

SUN+EARTH CERTIFIED FARM PLAN

Contact Information			
Name of Legally Registered Business or Person			
Mailing Address			
Farm Location Address (If different than above)			
Email		Phone	

Contact Information			
Name of Authorized Primary Contact for Certification			
Email		Phone	

General Description	
Please provide a general description of your operation. What is this farm's story?	

Grower Application and Management Plan

Basic Information			
Type of Operation (Greenhouse, Outdoor)	Crop Canopy Area (Square Feet)	Number of Scheduled Harvests	Number of Mature Plants at Harvest
Outdoor full season areas, Autoflower and late season planting.			
Greenhouses			
Propagation			
Do you also grow non-cannabis crops? If yes, please list which crops.			
Do use supplemental lights in any production stage? If yes, please describe.			

Contamination Prevention	
Is this a 100% organic, or regenerative farm? Are any crops or land on the farm managed non-organically?	

Natural Resources	
What is the source of your irrigation water? Do you use pH adjusters? If yes, which ones?	
Do you use diesel or gas generators as your primary source of electricity?	
How are natural ecosystems preserved or rehabilitated at your grow location?	

Seeds, Seedlings, Cuttings, Soil

Describe your system for plant propagation.	
Do you buy seeds? Do you save seeds?	
Please list potting soil used, plus any production aids or amendments used for cuttings or seedlings. Do you use plugs? Rooting hormone?	

Fertility Management

Describe your system and practices for plant fertility. How do you maintain or improve soil quality on your farm?	
--	--

Pest Control

Describe your system and practices for preventing and combating plant pests. Do you have strategies for preventing and controlling Hemp Russet Mite, Broad Mite, Bud Rot (Botrytis), Powdery Mildew, and Fusarium/Verticillium?	
--	--

Sanitation

Please describe sanitation procedures and materials used.

Basic Post-Harvest Activities

Please describe in detail your post-harvest handling activities, such as drying sorting, storage, processing and packaging.

What markets are you going to sell your cannabis into?

Labels

Please describe how you intend to label your product. (Retail labels? Bulk labels?)

If lot numbers are used, please describe lot numbering system.	
--	--

Community

Please describe how your farm interacts with the community.	
---	--

How do you give back to the community?	
--	--

Do you provide tours workshops, trainings about sustainable farming?	
--	--

Recordkeeping

Please describe your recordkeeping system for tracking fertility and pest control inputs.	
---	--

<p>Please describe your recordkeeping system for tracking purchases of fertility and pest control materials and other farm inputs.</p>	
<p>Please describe your recordkeeping system for tracking harvest and sales.</p>	

Worker Rights

<p>How do you determine worker pay and/or what other forms of compensation do you provide?</p>	
<p>Do you have written worker policies in-place for protecting workers from harassment and discrimination?</p> <p>Do you have written contracts with your workers?</p>	

WORKER FEEDBACK (To be filled out by auditor)	
---	--

Land History	
<p>For SUN+EARTH CERTIFIED status, soil or soil medium where crop is planted must be free of prohibited substances for no less than three years prior to harvest of the crop.</p> <p>For transitional SUN+EARTH CERTIFIED status, soil or soil medium where crop is planted must be free of prohibited substances for no less than one year prior to the harvest of the crop. Transitional operations are also allowed to use the SUN+EARTH CERTIFIED logo, but the certificate will indicate transitional status.</p> <p>Production areas must have distinct and defined boundaries that adequately prevent contamination from adjacent production areas or land uses that are not SUN+EARTH CERTIFIED.</p>	
<p>Please describe the buffer areas in place to prevent contamination from non-SUN+EARTH CERTIFIED grow operations nearby, if applicable.</p>	
<p>If you grow crops directly in the ground, please describe the land history for the past three years, and fill out the chart below.</p>	

Year	Land Use	Substances applied to land or plants
2021		

2020		
2019		
2018		

Grower Materials

Please list ALL materials and substances used to grow your SUN+EARTH CERTIFIED crop.

Without a complete and accurate list of materials used to produce your SUN+EARTH CERTIFIED crop, we will be unable to determine compliance to the SUN+EARTH CERTIFIED rules, resulting in delay and possible denial of your certification request.

Instructions:

1. You must list the brand name and manufacturer of all production inputs.
2. You must submit a copy or photo of the product label, for any products not listed as allowed with the [Organic Materials Review Institute](#)(OMRI) or [Washington State Department of Agriculture Organic Program](#) (WSDA).
3. Please include all input materials used in the production of your crop, such as, potting soil, potting soil additives, fertilizers, pesticides, microorganisms, pH buffers, beneficial insects, etc.
4. This list is an essential piece of your SUN+EARTH CERTIFIED Management Plan. It is your responsibility to maintain an accurate and current list of materials and ensure they have been allowed for use in SUN+EARTH CERTIFIED production.

Brand Name of Material	Manufacturer	Purpose for Use

Affirmation of Understanding

AFFIRMATIONS AND SIGNATURES

The undersigned agrees to the following:

- I/We affirm that this application is an accurate representation of all materials and methods used in the production or handling of SUN+EARTH CERTIFIED products.
- I/We agree to follow SUN+EARTH CERTIFIED standards and notify SUN+EARTH CERTIFIED with any significant changes that could affect the certification status of the farm.
